

Flocculators & Agitators | Mixers

DBS MANUFACTURING, INC.

DBS Manufacturing is a successful, privately held business that designs, manufactures, and provides application engineering for products sold to original equipment manufacturers, end users, and municipal and industrial facilities around the world.

Flocculators, Agitators, & Mixers

DBS Manufacturing provides custom solutions for many unique flocculator and mixer applications for a variety of industries. Flocculators, agitators, and mixers are built for OEM applications and to retrofit existing equipment.

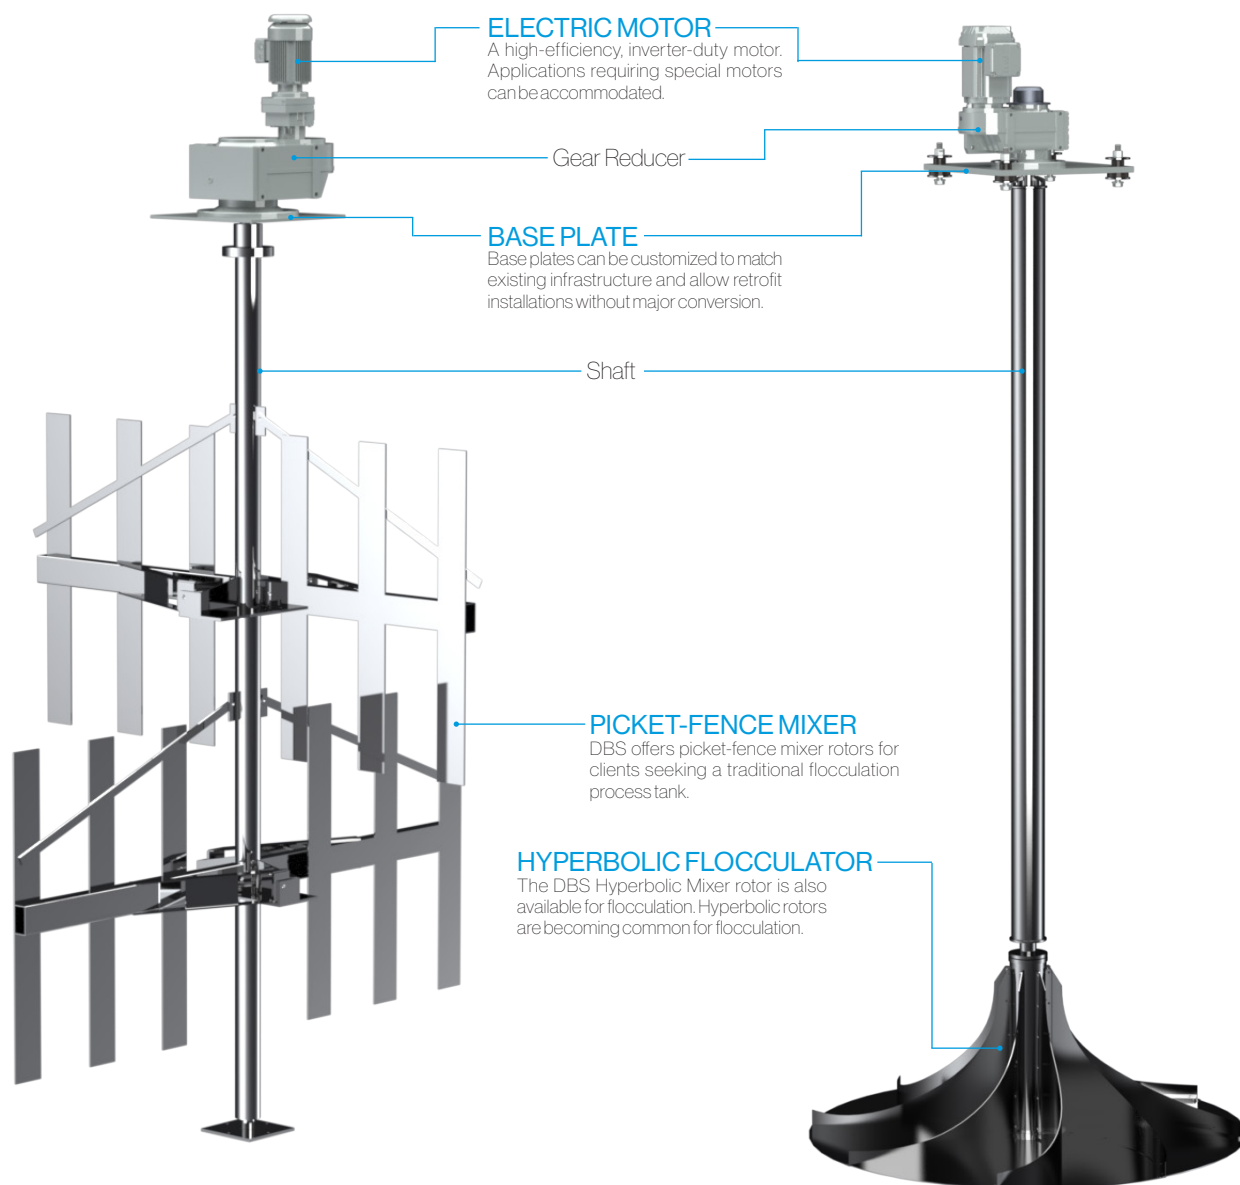

All DBS mixers and flocculators are powered by high-efficiency, severe-duty, inverter-duty rated electric motors up to 100 HP. They also come with high-efficiency, severe-duty gear reducers with a high service factor for a long, reliable life.

Oversized output bearings provide high shock load capacity, and solid or torque tube shafts are designed to operate 40% below the unit's first critical speed.

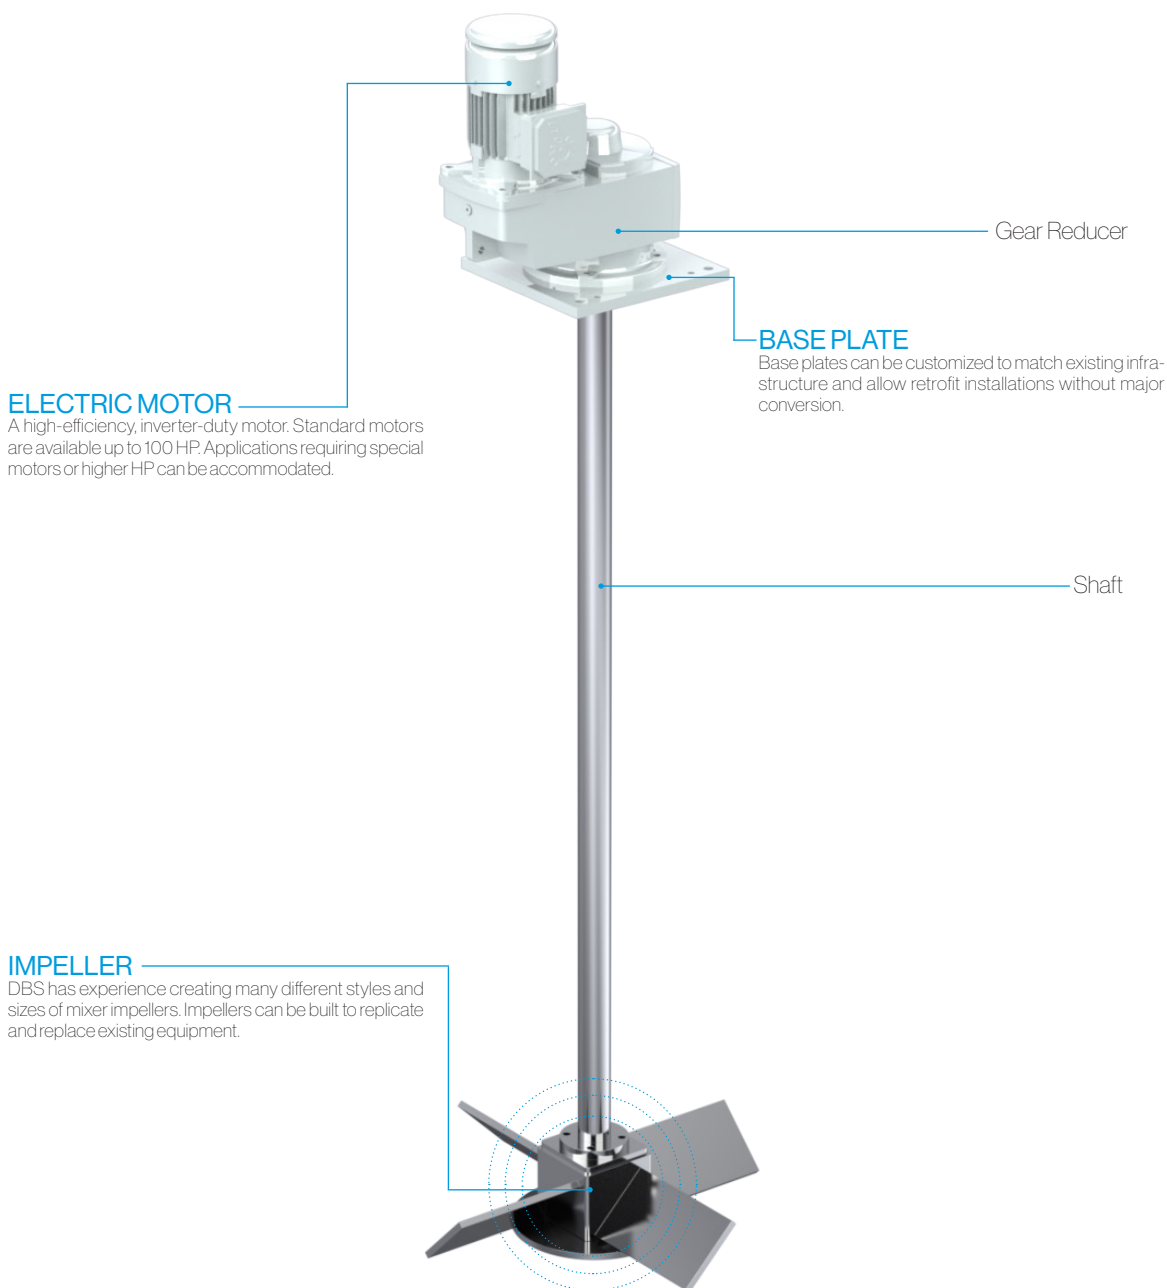

FLOCCULATORS

DBS Flocculators can be custom built to meet specific process requirements or serve as direct replacements for existing equipment. The electric motors are severe-duty and VFD compatible. To ensure long-term reliability in demanding environments, DBS offers a range of corrosion-resistant options, including galvanized components, stainless steel or brass construction, and specialized protective coatings.

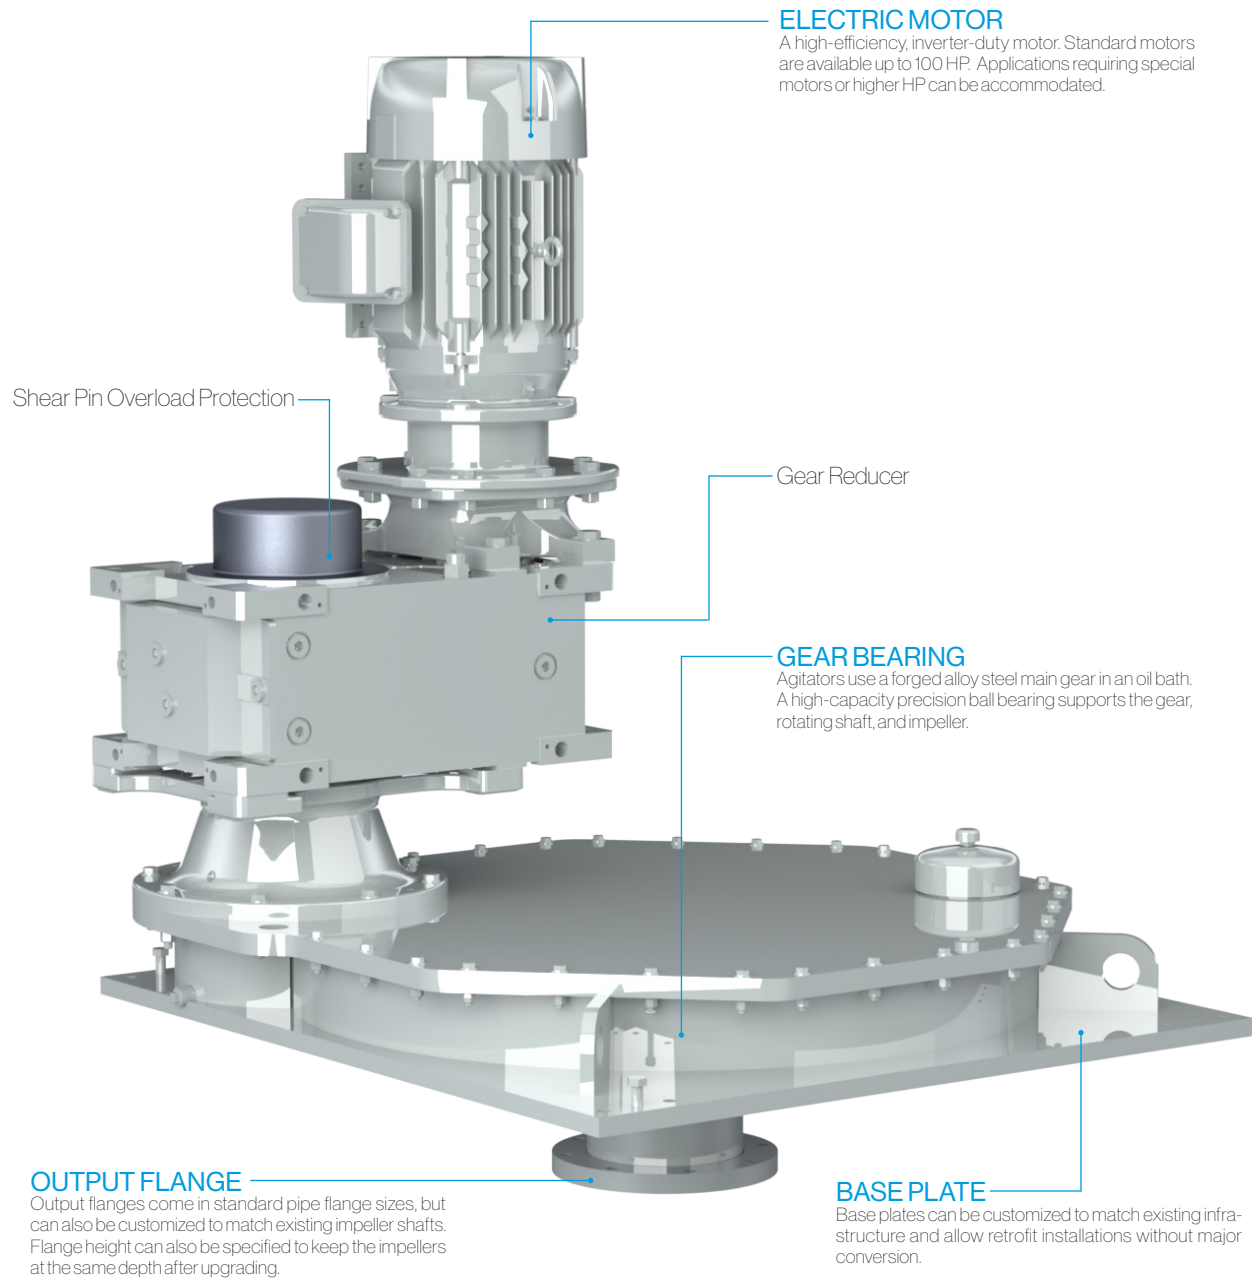

RAPID MIXING APPLICATIONS

DBS Mixers can be custom built to meet specifications or replace failed equipment. The electric motors are severe-duty, VFD compatible, and available in up to 100 HP. A wide variety of corrosion prevention methods are available on DBS mixers including galvanizing, stainless steel or brass construction, and coatings.

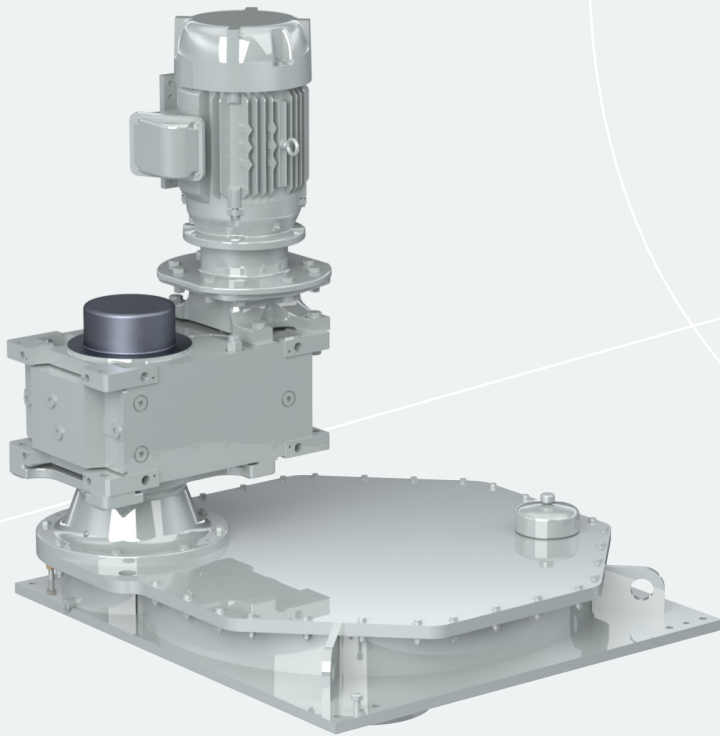

AGITATORS

DBS Agitators are engineered for mixing in demanding industrial environments. They deliver consistent performance, long service life, and reliable operation.

DBS[®] MANUFACTURING

- Clarifier & Thickener Drives
- Hyperbolic Mixers
- Low-Speed Surface Aerators
- Rotary Distributor Center Mechanisms

Mixing & Agitation | M-SERIES
